POST CARE PRP HAIR LOSS INJECTIONS/MICRONEEDLE WITH EXOSOMES

PRP and Exosomes will cause an increase in the thickness of hair density of the existing hair follicle.

We highly recommend pairing these treatments with our Medical Grade Hair products or prescription strength hair solutions, along with Nutrafol hair supplements.

1. You may experience some mild soreness and swelling to the scalp for a few days.
2. You May apply any remainder Exosome/PRP on to your scalp tonight.
3. You may wash your hair **48 hours after** your treatment.
4. You may wear clean hats immediately after your treatment.
5. You may have your hair colored **7 days** after your treatment
6. You will start noticing increased hair growth in 8 weeks and maximum results 4-6 months from the procedure.
7. One full treatment consists of 3 PRP Hair loss injection or Microneedle Scalp Exosome appointments spaced at least 1 month apart. *Maintenance treatments are recommended every 6 to 12 months after your series of three.
